- SSD drive would come very handy especially for boosting performance
- Your Mac must be running OS X Yosemite 10..
- Your Mac Must
- Your Mac must have 850 MB of disk space on the boot volume
- It must have an Intel Core 2 Duo, Core i3, Core i5, Core i7, Intel Core M or Xeon processor.. Hence, I thought of giving a chance to an efficient virtual machine like Parallels Desktop 13..

Import data from your Windows PC to your Mac For instructions, see KB 123929 Upgrade an existing Windows 7, 8 or 8.

I tried Apple's Boot Camp software to But I didn't find the software much user-friendly as I had to partition the hard drive to make space for the new operating system.. Much to my surprise, running Windows 10 on Mac using Parallels Desktop 13 is a lot easier, and you will really like using it!For those unfamiliar, a virtual machine is basically a virtual simulation of a real machine, which allows you to run a full-fledged operating system on your computer without needing to partition the hard drive.
